Ethical Committee for Medical Research

Jalan Pendidikan 37, Tel.62-640874 Fax. 62-641717 Mataram 83125
INDONESIA

Register Number : 402/UN18.F7/ETIK/2018

December 27, 2018

To Rohadi MD
Faculty of Medicine, the University of Mataram

Decision Issued from the meeting

Since research under the topic **“The Effect of Snakehead Fish (*Channa striata*) Extract Capsule to the Albumin Serum Level of Post-operative Neurosurgery Patients”** that has been submitted to the Ethical Committee for Medical Research by Rohadi MD, Bambang Priyanto MD, Januarman MD (Faculty of Medicine, Universitas Mataram), is in full conformity with the relevant provisions of the International Ethical Recommendations for biomedical researches involving human beings, hereby, we grant an ethical permission for conducting above-mentioned research.

Sincerely,

dr. Arfi Syamsun, Sp.KF., M.Si.Med
Chairman, Ethical Committee for Medical Research
Faculty of Medicine, the University of Mataram
Mataram, INDONESIA

to me

Dear Dr Rohadi M Rosyidi

Greetings!!!

We are Pleased to inform you that your paper has been received. Your manuscript no. is **BPJ-2419** . Do keep it for future correspondence.

We would like to tell you that your paper will undergo two stages REVIEW PROCESS which normally takes 3-4 weeks to complete, after that your paper will send to Managing Editors committee for final approval and based on that we will inform you about the status of your paper accordingly. The whole process will take 5-6 weeks to complete.

The following steps will be followed:

1. The manuscript will go through a basic editorial review.
2. An acceptance will be mailed to you on successful review.
3. A bill for printing charges will be sent to you.
4. The article will be published online in the coming issue i.e. both (online and print)

Please suggest us some potential reviewers along with their area of specialization, affiliation and e-mail addresses for our database (optional).

Attach here are the corrections we need to be done in your word file so please update this correction and send us your revised file.

Kindly please share your Facebook, LinkedIn and twitter profiles so that when we share your article on our social channels and we can tag you there.

Also please follow us on our social media channels for regular updates.

Dear Dr Rohadi Abu Faiz,

Greetings!!

Have a nice day!!

We would like to tell you that attach here is the 1st review report of your paper. Kindly go through it and send us the revised file according to the reviewers comments.

Soon you will receive the 2nd review report of your paper.

Looking forward to hear from you.

Best Wishes

ABSTRACT

To evaluate the Effect of Snakehead Fish (*Channa striata*) Extract Capsule to the Albumin Serum Level of Post-operative Neurosurgery Patients. **Material and Methods:** This research is a clinical research with **Quasi-Experimental method**. The experimental design used was one group pre-post test. The research design of one group pretest-posttest was measured using a pre-test which carried out before being given treatment and post-test carried out after being treated. The population of this study was all post-neurosurgical patients that treated at the West Nusa Tenggara General Hospital. Each patient who underwent surgery and included within research criteria was given Snakehead Fish (*Channa striata*) up to 3 weeks after surgery and the wound has healed. The sample consisted of 37 patients with criteria of over 18 years of age and no kidney disorders (proteinuria). **Result:** The results of the data distribution of 37 patients stated that there were 12 males (32.4%) and 25 females (67.6%). The most number of diagnosis were abnormalities of meningioma and skull defect (17; 46% and 13; 35,1%). Mostly patients spent 8 – 14 days to control post-
