We have reached a decision regarding your submission to Biodiversitas Journal of Biological Diversity, "Molecular phylogeny of anchovy (Clupeiformes: Clupeidae) from southern waters of Lombok using mitochondrial DNA CO1 gene sequences".
Our decision is: Revisions Required

Reviewer A:
Dear author and co-authors,
Thank you for submitting this interesting paper. Constructing molecular phylogeny of anchovy from southern part of Lombok Is. using mtDNA CO1 gene sequences, for review. The paper overall is relatively robust and the genetic analysis is well considered. The conclusions on anchovy species diversity and genetic distance are interesting and well considered. To make sure that this research is repeatable for other researchers, there are some revisions, required, however. I have attached specific comments on the word document, please use these when making revisions. Additionally, please consider the following

Reviewer A:
Dear Authors,
Overall the revised version reads much better and complete. I would suggest a few transition words to improve the meaning as found in attached file.
The revision fulfilled the required standard and I have no doubt to get it out after final check from an assigned editor.
Recommendation: See Comments
