		<p>mce@spbstu.ru or write here in Discussion field. Please share this information with your co-authors and colleagues! We look forward to further cooperation with you! Yours sincerely, Magazine of Civil Engineering Team.</p>
April 19, 2022, 6:45 a.m.	Author	<p>Dear Editor, Thank you for your warm reply. Wish you good health every day. Sincerely yours, Ni Nyoman Kencanawati</p>
April 14, 2022, 11:17 a.m.	Editor	<p>Dear author! We don't really know when Scopus indexes all our issues. Sometimes it takes very long time. This problem has appeared not only now, every year they delay uploading the latest issues of the journal. Don't worry, the journal continues to be indexed, no one has excluded it, and the journal is not being checked by experts. We should just wait.</p>
March 29, 2022, 11:50 a.m.	Author	<p>Dear Editor in Chief Magazine of Civil Engineering, I would like to express my highest gratitude because my article has been published in your journal. Furthermore, I would like to ask whether my article doesn't appear on my Scopus profile? Perhaps there is something that I need to fulfil related to the requirement? Thank you for your cooperation and if you need a reviewer for your journal in the future, I am available to help you. Thank you. Sincerely yours, Ni Nyoman Kencanawati</p>
Feb. 28, 2022, 5:19 p.m.	Editor	<p>Dear author! Your article has been published http://engstroy.spbstu.ru/article/2021.108.11/ We ask you to fill out the license agreements for the article and send them to the editorial office at: mce@spbstu.ru They must be filled in for each author, indicating the passport data, and signed. You can find the license agreement form on the article page in the E-submission system the Author action panel.</p>

Review for article "Properties of Tropically Sourced Timber Subjected to Elevated Temperature"

Journal/edition topic relevance:

- fully relevant
- partially relevant*
- totally irrelevant*

Article originality:

- material is original
- material was partially published*
- material was fully published before by the author*
- material was fully published before by someone else*

Topicality:

- subject of article is topical
- subject of article is partially topical*
- subject of article is not topical*

Provisions of the article justification:

- provisions of the article are sufficiently justified
- provisions of the article are partially justified*
- provisions of the article are not justified*

Article representation:

- clear, sufficiently detailed
- short, condensed, needs in more detailed representation*
- too long, needs to be shorten*

Representativeness and relevance of references used in the article:

- references are topical and representative
- references are partially topical and representative*
- references are not topical or representative*

Author's contribution:

- article has concrete and original results, clearly articulated by author
- article has results, but the wording of results is implicit or missing*
- article does not contain results*

Research level:

- high
- middle*
- low*

Article structuring:

- high quality
- middle quality*
- low quality*

Article formatting:

- fully complies with the requirements of the journal
- partially complies with the requirements of the journal*
- does not comply with the requirements of the journal*

Title:

- meets the journal's requirements
- does not meet the journal's requirements*

Abstract:

- meets the journal's requirements
- needs rewriting*

Abbreviations:

- are commonly used and readable to the majority of readers
- are rarely used and make understanding the text more difficult*

Need for research:

- is properly motivated and formulated in the Introduction section
- is not properly motivated and/or formulated*

Methods:

- methods are disclosed in the Methods section in a form whereby other scientists can repeat the research
- there is no determination of the research method and/or it is not sufficiently described*

- Personal profile
- My articles (1/0)
- My reviews
- Мои переводы (0/0)
- My co-authors (4)
- Journal contact info
- Help
- Tech. support
- Exit

Object of research:

✓ author has formulated the research object and subject
author has not formulated the research object and subject

Aim and task of the research:

✓ aims and tasks of research are well-defined
aims and tasks of research are poorly defined

Comparison of achieved results with other authors' research:

✓ is given
is not given

Conclusion:

✓ contains a short formulation of new scientific results achieved by the author
does not contain a short formulation of new scientific results achieved by the author

Reviewer comments

The title of the article, although it meets the requirements of the journal, but, in my opinion, does not accurately reflect the content.
