HYDROLOGICAL DROUGHT INDEX BASED ON RESERVOIR CAPACITY;
Case study of Batujai Dam in Lombok Island, West Nusa Tenggara, Indonesia

Dear I Wayan Yasa,

We have carefully evaluated your manuscript, entitled:
HYDROLOGICAL DROUGHT INDEX BASED ON RESERVOIR CAPACITY;
Case study of Batujai Dam in Lombok Island, West Nusa Tenggara, Indonesia, and
feel that as it stands we cannot accept it. We might, however, be able to accept it if
you could respond adequately to the points that have been raised during the review
process (see below).

Please revise your manuscript strictly according to the attached Reviewers'
comments. Your manuscript won't be taken into consideration without the revisions
made according to the recommendations.

Statement 1 should be filled again only if there have been significant changes.

Authors are requested to prepare a revised version of their manuscript as soon as
possible. This may ensure fast publication if an article is finally accepted.

Review 1:

(this review has file attachment)

Detailed corrections and comments were made in text file. However, there is a few question important for scientific character of this paper.

Chapters 3.3 and 3.4 needs explanation about content of graphs as well as parameters of estimated functions and their interpretation

Chapter 3.5 lacks analysis of estimated drought index time variability (changes), there is no interpretation of relationship between RDI and water level elevation.

There also should be explained the procedure of drought types classification, what was the idea for class limit values of RDI, why different wide of RDI ranges for following drought types?

Chapter 4 (conclusions) is too short in relation to paper content. If author(s) in article put the stress on statistical characterisation of relation between drought parameters as well as seasonal dynamics of the process, the applicable matter in context of water management and environment state should be presented in conclusion.

Text should be linguistically revised, especially in context words and part of sentences repetition.
