Dear Authors,

Thank you for submitting your article entitled: **"Drop foot and Adult-Onset Tethered Cord Syndrome caused by Filum Terminal Ependymoma: Case Report"**

Based on our author guidelines, Your article fulfilled the minimal required structure,

<https://www.balimedicaljournal.org/index.php/bmj/pages/view/authorguidelines>

In order to have a better-structured article, we suggest you edit based on a checklist and the collection in our archive (<https://www.balimedicaljournal.org/index.php/bmj/issue/archive>).

According to the new International regulation, please fulfill the requirements below:

1. Ethical clearance number/statement and/or informed consent at the end of the manuscript. Please described the patient's consent for publication in the disclosure section (**Unconfirmed**).
2. Please state your conflict of interest in the paper (**Unconfirmed**). Please fulfill the ICJME author form (**See attachment below**)
3. Please state the funding (if any) in your paper. (**Unconfirmed**)
4. Please state each author's contribution (**Unconfirmed**).
5. We detected 221 critical grammatical errors based on our proofreading application.
6. Please add the author's full name and affiliation in the manuscript. The affiliation of each author needs to be appropriately written by suggesting their University, Institution, or any other relevant background.
7. Please follow the Introduction, **Case** presentation and Conclusion in writing the abstract of the **case report** article
8. Please add keyword supposedly better written less than 5 words.
9. For each **case**, please add:
 - a) The relevant physical examination (PE) and other significant clinical findings
 - b) Important information from the patient's history organized as a timeline
 - c) Diagnostic methods (such as laboratory testing, imaging)
 - d) Diagnostic reasoning including other diagnoses considered
 - e) Types of intervention (such as pharmacologic, surgical, preventive, self-care) and Administration of intervention (such as dosage, strength, duration)
 - f) Intervention adherence and tolerability (How was this assessed?)
