**Journal Title**

Civil Engineering and Architecture

**Manuscript Title**

Impact curing time and compaction methods to the performance of Hot Mix Asphalt Asbuton

**Abstract**

Asbuton is rock asphalt in the form of sediment in limestone formations containing between 15% and 35% of natural asphalt by weight of the rock. It is estimated that about 670 million tons of Asbuton reserve is located on Buton Island, Indonesia and can be used to serve the demand of national roadway infrastructure. The asphalt contained is hard, resulting in very high viscosity, making it extremely difficult to facilitate uniform aggregate coating and to bind asphalt mixtures. These challenges in the process of incorporating Asbuton in asphalt mixtures makes it less popular than the petroleum asphalt. The current Indonesia standards require Hot Mix Asphalt incorporating Asbuton (HMAA) to be cured for a few days before it is compacted (scenario 1). The curing duration is aimed to allow softening of the natural asphalt contained in Asbuton. This study investigated a new method of conditioning HMAA (scenario 2). The results showed that the volumetric and Marshall characteristics of HMAA were influenced by the curing time and compaction methods. The findings suggest that the curing method proposed in scenario 2 can be omitted, as such it can speed up the asphaltting process. This study found that HMAA can be spread and compacted without curing, with a provision made for the road to be closed from traffic for a minimum of eight days after the compaction is complete.

**Keywords**

Asbuton, compaction, curing time, Marshall stability, volumetric characteristics, rock asphalt

**Copyright**

Yes

Dear I Dewa Made Alit Karyawan,

Thank you very much for submitting your manuscript to HRPUB.

In order to expedite the publication process, your manuscript entitled "Impact curing time and compaction methods to the performance of Hot Mix Asphalt Asbuton" has been sent out to evaluate.

But some problems need to be addressed.

We would be grateful to you if you could revise your manuscript according to the following comments:

1. Figure 2 is similar to figure 1. Please check it.

\*Please highlight the changes you have made.

Kindly respond to the evaluation and send your revised manuscript to [preview.hrpub@gmail.com](mailto:preview.hrpub@gmail.com) as soon as possible. Please track status of your manuscript through the Online Manuscript Tracking System.We will contact you again once a new decision is made on your manuscript. You will expect a review report from Anthony Robinson ([revision.hrpub@gmail.com](mailto:revision.hrpub@gmail.com)) in the following 45 days. Peer review reports are also downloadable in Online Manuscript Tracking System (<http://www.hrpub.org/submission/login.php>) once the review process is completed.**The author will be requested to pay the Article Processing Charges after the manuscript is accepted for publication.**For the charging standard, please refer to [http://www.hrpub.org/journals/jour\\_charge.php?id=48](http://www.hrpub.org/journals/jour_charge.php?id=48)

Please feel free to contact us if you have any questions. Besides, could you please leave us an alternate Email Address in case?

For more information, please visit the journal's homepage.

Guidelines: [http://www.hrpub.org/journals/jour\\_guidelines.php?id=48](http://www.hrpub.org/journals/jour_guidelines.php?id=48)

Please acknowledge receipt of this email.

Best Regards

Chloe Crawford

## Peer Review Report

### Notes

Please return the completed report by email within 21 days;

### About HRPUB

Horizon Research Publishing, USA (HRPUB) is a worldwide open access publisher serving the academic research and scientific communities by launching peer-reviewed journals covering a wide range of academic disciplines. As an international academic organization for researchers & scientists, we aim to provide researchers, writers, academic professors and students the most advanced research achievements in a broad range of areas, and to facilitate the academic exchange between them.

### Manuscript Information

Manuscript ID: **14827586**

Manuscript Title: **Impact Curing Time and Compaction Methods to the Performance of Hot Mix Asphalt Asbuton**

### Evaluation Report

General Comments	This study investigated a new method of conditioning HMAA (scenario 2). The results showed that the volumetric and Marshall characteristics of HMAA were influenced by the curing time and compaction methods. The findings suggest that the curing method proposed in scenario 2 can be omitted, as such it can speed up the asphaltting process. This study found that HMAA can be spread and compacted without curing, with a provision made for the road to be closed from traffic for a minimum of eight days after the compaction is complete.
Advantage & Disadvantage	In Buton Island, Indonesia, there is naturally occurring asphalt, in the form of rock asphalt, containing 61.7% ash content, 2% moisture content, and 27% asphalt content [1], [2] called Asbuton. Asbuton is rock asphalt in the form of sediment in limestone formations containing between 15% and 35% of natural asphalt by weight of the rock. The asphalt contained is hard, resulting in very high viscosity, making it extremely difficult to facilitate uniform aggregate coating and to bind asphalt mixtures. These challenges in the process of incorporating Asbuton in asphalt mixtures makes it less popular than the petroleum asphalt.
How to improve	The road will be closed to traffic for less than eight days after the compaction is completed.
Please rate the following: (1 = Excellent) (2 = Good) (3 = Fair) (4 = Poor)	
Originality:	1 = Excellent
Contribution to the Field:	1 = Excellent
Technical Quality:	1 = Excellent

Clarity of Presentation :	2 = Good
Depth of Research:	2 = Good
<b>Recommendation</b>	
Kindly mark with a ■	
<input type="checkbox"/> Accept As It Is	
<input checked="" type="checkbox"/> Requires Minor Revision	
<input type="checkbox"/> Requires Major Revision	
<input type="checkbox"/> Reject	

Return Date:

## Peer Review Report

### Notes

Please return the completed report by email within 21 days;

<b>About HRPUB</b>	
Horizon Research Publishing, USA (HRPUB) is a worldwide open access publisher serving the academic research and scientific communities by launching peer-reviewed journals covering a wide range of academic disciplines. As an international academic organization for researchers & scientists, we aim to provide researchers, writers, academic professors and students the most advanced research achievements in a broad range of areas, and to facilitate the academic exchange between them.	
<b>Manuscript Information</b>	
Manuscript ID:	14827586
Manuscript Title:	Impact Curing Time and Compaction Methods to the Performance of Hot Mix Asphalt Asbuton
<b>Evaluation Report</b>	
General Comments	The subject of the article is interesting. It is recommended to mention the universal problem in the abstract of the article. Indonesia is mentioned. The problem is valid for the whole world. <b><u>It is considered that the article could be published after minor revision.</u></b>
Advantage & Disadvantage	-Figure 2 explains the procedures that were done in the research very well. - The conclusion part of the article is not suitable for a scientific study.

How to improve	<p>-It is recommended to revise the sentence that begins "Of the five regions" in the Introduction.</p> <p>-In the Introduction section, the sentence "It is estimated that there are about 670 million tons of Asbuton deposits on Button island The deposits are found in limestone formations with natural asphalt residues between 15% and 35% of asphalt by weight" was also mentioned in the abstract. The same sentences should not be repeated in the article.</p> <p>-Indonesian standard is mentioned in Reference 8 in the text. However, an article was referenced in the references section. The relevant Indonesian standard should also be added to the article's references section.</p> <p>-In the last part of the introduction, the research aims should be given in text form, not in substance.</p> <p>- Under the "3.3. HMAA and curing specimen" title more information should be given. According to which standard was the curing process of the samples done? Reference should be given.</p> <p>-In Figures 9 a and b, it was observed that cold compacted values were higher than hot compressed values. However, the opposite situation occurred in Figure 9c, what is the reason for this?</p> <p>-Why were the best results obtained on 8-day cured samples? What are the negative effects of 12-day cured samples?</p> <p>-The conclusion part of the article should be completely rewritten. The conclusion part of the article is not suitable for a scientific study. More information should be given. It is recommended to give numerical data.</p>
Please rate the following: (1 = Excellent) (2 = Good) (3 = Fair) (4 = Poor)	
Originality:	2
Contribution to the Field:	2
Technical Quality:	2
Clarity of Presentation :	2

Dear editor

Thank you for your comments and corrections to our manuscript.

The correction needed is related to the similarity of figure 1 and figure 2. We provide an explanation in the attachment.

If revisions/additions are still needed regarding an explanation of the attachment, please inform us immediately and we will respond as soon as possible.

Thank you

Best Regards

I Dewa Made Alit Karyawan

**EXPLANATION OF REVISION OF FIGURE 1 AND FIGURE 2.pdf**

109K

Explanation:

Figure 2 is similar to figure 1.

It is similar, the difference is only in the compaction process.

Scenario 1 (Figure 1) shows that the compaction of the asphalt-concrete mixture as a sample is carried out after curing.

Meanwhile, Scenario 2 (Figure 2) shows that the compaction of the asphalt-concrete mixture (for the sample) is carried out without curing. Curing is carried out on the sample (mixture that has been compacted) in a few days.

The following figure shows this explanation:

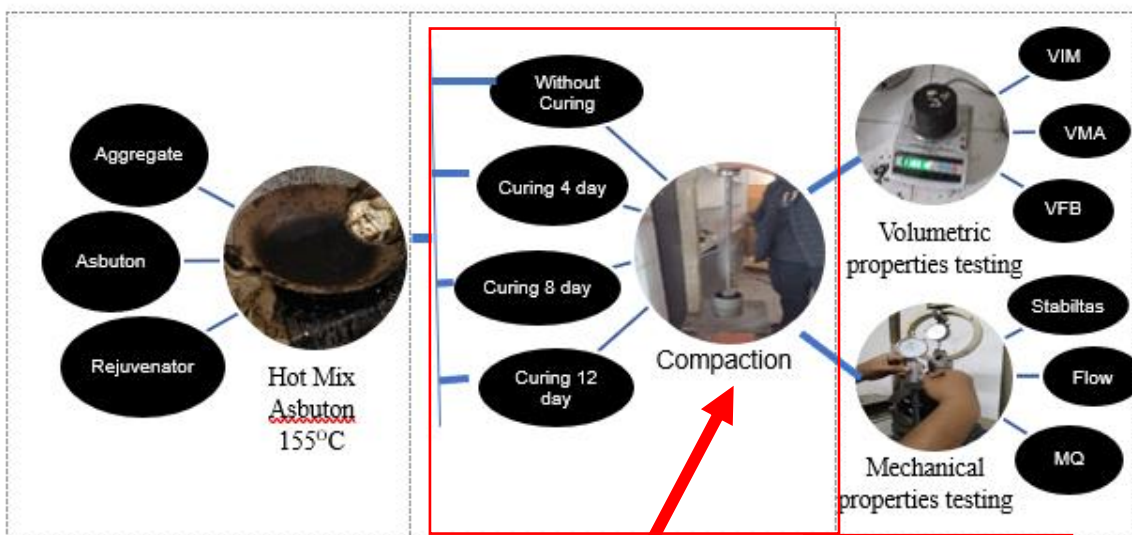

Figure 1. Preparation and testing of specimens under scenario 1 (compacting after curing)

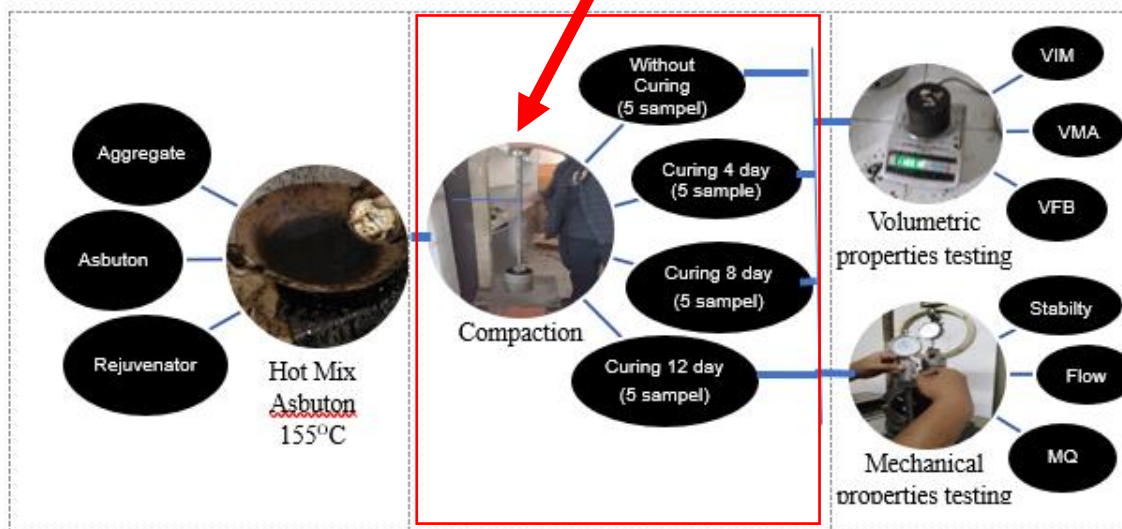

Figure 2. Preparation and testing of specimens under scenario 2 (curing after compaction)

Dear I Dewa Made Alit Karyawan,

Thank you for your interest in publishing your work in HRPUB.

Your manuscript has now been peer reviewed and the comments are accessible in Word format.

Usually, we invite 2 peer reviewers for one manuscript. Compared with both review reports, the overlapped parts can be ignored.

Please confirm all comments from the two reviewers have been effected in your paper.

We would be grateful if you could address the comments of the reviewers in a revised manuscript and answer all questions raised by reviewers in a cover letter. Any revision should be made on the attached manuscript.

### Note:

**1. In addition to necessary revisions, please note that the similarity index of the revised version should be lower than 18% and similarity from a single source should not exceed 5%.**

**2. Based on the theme of your manuscript, we would like to recommend the following published articles for your reference. If it is useful in enriching your manuscript, you can cite them in your manuscript. If not, just ignore it.**  
**Treatment of Liquefiable Soils by the Ballasted Column Technique: Case of Martil River Bridge in the North of Morocco** <https://doi.org/10.13189/cea.2022.100221>  
**Influence of RAP and Waste Plastic on Cracking Resistance of Warm SMA Mixes** <https://doi.org/10.13189/cea.2022.100107>

Please download the publication agreement ([http://www.hrpub.org/download/HRPUB\\_Publication\\_Agreement2022.pdf](http://www.hrpub.org/download/HRPUB_Publication_Agreement2022.pdf)) and fill in the authors' names, manuscript title, manuscript ID and signature, then send a scanned version to us.

Please submit the revised paper to us by email in MS Word or LaTeX format within two weeks and do not submit it into the Online Manuscript Tracking System.

The author will be requested to pay the Article Processing Charges after the manuscript is accepted for publication. For the charging standard, please refer to [http://www.hrpub.org/journals/jour\\_charge.php?id=48](http://www.hrpub.org/journals/jour_charge.php?id=48)

Look forward to receiving your revised manuscript as soon as possible.

**Please acknowledge receipt of this email.**

**Note:**

**1. In addition to necessary revisions, please note that the similarity index of the revised version should be lower than 18% and similarity from a single source should not exceed 5%.**

**2. Based on the theme of your manuscript, we would like to recommend the following published articles for your reference. If it is useful in enriching your manuscript, you can cite them in your manuscript. If not, just ignore it.**

**Treatment of Liquefiable Soils by the Ballasted Column Technique: Case of Martil River Bridge in the North of Morocco** <https://doi.org/10.13189/cea.2022.100221>

**Influence of RAP and Waste Plastic on Cracking Resistance of Warm SMA Mixes**  
<https://doi.org/10.13189/cea.2022.100107>

Please download the publication agreement ([http://www.hrpub.org/download/HRPUB\\_Publication\\_Agreement2022.pdf](http://www.hrpub.org/download/HRPUB_Publication_Agreement2022.pdf)) and fill in the authors' names, manuscript title, manuscript ID and signature, then send a scanned version to us.

Please submit the revised paper to us by email in MS Word or LaTeX format within two weeks and do not submit it into the Online Manuscript Tracking System.

The author will be requested to pay the Article Processing Charges after the manuscript is accepted for publication. For the charging standard, please refer to [http://www.hrpub.org/journals/jour\\_charge.php?id=48](http://www.hrpub.org/journals/jour_charge.php?id=48)

Look forward to receiving your revised manuscript as soon as possible.

**Please acknowledge receipt of this email.**

Dear Dr. I Dewa Made Alit Karyawan,

Your paper has been accepted for publication. Herewith attached is the Acceptance Letter.

Please download the publication agreement ([http://www.hrpub.org/download/HRPUB\\_Publication\\_Agreement2022.pdf](http://www.hrpub.org/download/HRPUB_Publication_Agreement2022.pdf)) and fill in the authors' names, manuscript title, manuscript ID and signature, then send a scanned version to us.

The publication fee is \$480. Below are Wire Transfer instructions.

Beneficiary name: HORIZON RESEARCH PUBLISHING CO., LTD  
Beneficiary account number: 33113742  
Banking Swift code for international wires: CATHUS6L  
Beneficiary bank name: Cathay Bank  
Beneficiary bank address: [4128 Temple City Blvd, Rosemead, CA 91770 United States](#)  
Note: Please add \$35.00 for wire transfer fee.

The bank charge would be deducted prior to the receipt of the payment. To avoid a shortfall on the net amount received and request for repayment, authors shall pay the commission charge while making the payment.

Once the payment is finished, please inform us or send the remittance bill to us.

*Please note that "Civil Engineering and Architecture" has passed the re-evaluation of Scopus and all papers published in 2022 will be covered by Scopus.*

Best Regards

## Acceptance Letter

Dear I Dewa Made Alit Karyawan,

Congratulations! As a result of the reviews and revisions, we are pleased to inform you that your following paper has been accepted for publication.

Paper Title: Impact Curing Time and Compaction Methods to the Performance of Hot Mix Asphalt Asbuton

Paper ID: 14827586

Contributor (s): I Dewa Made Alit Karyawan, Ratna Yuniarti, Desi Widianty, Hasyim, Mudji Wahyudi

It is scheduled for publication on Civil Engineering and Architecture, Vol 10, No 5.

The publication fee \$ 480 should be paid within 2 weeks.

Should you have any questions, please feel free to let us know by quoting your **Paper ID** in any future inquiries.

Best wishes,

*John Thompson*

Dear Dr. I Dewa Made Alit Karyawan,

Your manuscript has been accepted for publication. Authors are given a chance of checking the attached manuscript before publication. If we don't receive any confirmation or feedback of the manuscript before 07/08/2022, it will be regarded as the final version.

\* Please carefully check the whole manuscript to ensure consistency and accuracy in grammar, spelling, punctuation and formatting, especially those parts proofread by our team.

All revisions should be made and highlighted on the attached manuscript.

Best Regards

Anthony Robinson

Dear Anthony Robinson

There are improvements to the paper that need to be made, with details:

1. All corrections based on proofread by your team have been accepted and corrected (see attachment: 14827586-REV)
2. Changes in the sentence "And, the use of rock asphalt contains aggregates and asphalt" so that it is appropriate as a continuation of the previous sentence (see attachment: Notes for corrections and improvements; and 14827586-REV)
3. Figure 2, the word "(5 samples)" is not needed so it must be omitted (see attachment: Notes for correction and refinement; and 14827586-REV).
4. The line thickness in Table 1, Table 4 and Table 5 does not match the format, has been corrected by bolding the lines at the top and bottom in bold (see attachment: Notes for corrections and improvements; and 14827586-REV ).

Best Regards

Dr. I Dewa Made Alit Karyawan

Dear Anthony Robinson

I would like to say that my paper has been published in Vol 10 No 5. DOI: 10.13189/cea.2022.100526. Title: Impact Curing Time and Compaction Methods to the Performance of Hot Mix Asphalt Asbuton, has not appeared on my Scopus account, while other authors in the same issue have appeared. Please explain and solve.

Thank you

Best Regard
