To Whom It May Concern:

April 24, 2023

As a peer reviewer of Civil Engineering and Architecture, Assoc. Prof. Heri Sulistiyono has fulfilled the duties admirably.

Civil Engineering and Architecture is an international peer-reviewed journal that publishes original and high-quality research papers in all areas of civil engineering and architecture.

This journal is available online at http://www.hrpub.org/journals/jour_info.php?id=48.

Publication of research articles in this journal is primarily dependent on the scientific merit, originality and the significance of the study. The reviewers and editorial team are selected based on their expertise and outstanding achievements in their field of expertise.

Assoc. Prof. Heri Sulistiyono has reviewed the following article for this journal.

ID: 14830618 (March 2023)

Paper Title: Numerical Simulation of Pile Design Method that Considers Negative Friction

Heri Sulistiyono <h.sulistiyono@unram.ac.id>

Civil Engineering and Architecture - Review Assignment (ID: 14830618)10 pesan

Sherley Miller <editorialboard.hrpub@gmail.com>

22 Maret 2023 pukul 16.07

Kepada: h.sulistiyono@unram.ac.id

Dear Assoc. Prof. Heri Sulistiyono ,

On the base of your expertise, we invite you to review this manuscript.

It would be nice of you to complete the review within 21 days. Sending in a review after the deadline will slow down the publication process.

During the review process, you are suggested to at least highlight sentences requested for polishing. It will be easier for authors to fix syntax errors if they know what the problem is.

Once the review is completed, please submit the review report attached in this email to us.

At the end of your peer review, we ask you to indicate your final decision on the manuscript, by selecting one of the following recommendations:

Accept as it is
Requires Minor Revision
Requires Major Revision
Reject

Please let me know whether you are able to carry out the review by Accepting or Declining this invitation. In case, you are unable to review this manuscript at this point of time, please suggest suitable reviewers if you know any.

Besides, we are now in the process of expanding our editorial board members. You are warmly welcomed to recommend some suitable reviewers to us.

Civil Engineering and Architecture is indexed by Scopus, the indexing information is available at https://www.hrpub.org/journals/jour_index.php?id=48.

Till now, 11 volumes 70 issues have been published.

For more detailed information, please refer to our website: http://www.hrpub.org/journals/jour_info.php?id=48

If you need the review certificate, please let us know when sending your review report to us.

Look forward to hearing from you soon.

Best Regards

About HRPUB

Horizon Research Publishing, USA (HRPUB) is a worldwide open access publisher serving the academic research and scientific communities by launching peer-reviewed journals covering a wide range of academic disciplines. As an international academic organization for researchers & scientists, we aim to provide researchers, writers, academic professors and students the most advanced research achievements in a broad range of areas, and to facilitate the academic exchange between them.

Manuscript Information

Manuscript ID: 14830618

Manuscript Title: Numerical Simulation of Pile Design Method that Considers Negative Friction

Evaluation Report

General Comments	This manuscript mentions proposing a new hybrid model that combines the finite element method and the elastic theory into a mathematical model using a computer program to simulate the behavior of piles and rafts. However, this paper does not explain the hybrid model clearly
Advantage & Disadvantage	This paper has the advantage of reviewing the advantages and disadvantages of some comparative methods. However, several abbreviations do not explain what they stand for, such as GASP, GARP, SPT, VNS, and CPT. Moreover, the Writing of nouns SAND, COBBLE, GRAVEL, GRANITE, and RHYOLITE with capital letters confused whether these are nouns or abbreviations. The way to write references is inconsistent and not in the official format. There are some confusing citations, such as Coyle & Reese [22]. There are many grammar mistakes. Lumb, 1962 and Badelow et al., 2009 are not listed in the references. There is an error in writing the reference name, such as Lambert, Kazenbach.
How to improve	<ol style="list-style-type: none"> 1. Explain clearly the new proposed hybrid model, 2. Explain the abbreviation at the first occurrence 3. Do not write nouns in all capital letters 4. Write citations and references consistently following the official format 5. Clarify the confusing citations 6. Revise grammar mistakes, or take advantage of professional proofreading 7. List all citations 8. Revise the reference names
Please rate the following: (1 = Excellent) (2 = Good) (3 = Fair) (4 = Poor)	
Originality:	3 (fair)
Contribution to the Field:	2 (good)

Technical Quality:	3 (fair)
Clarity of Presentation :	3 (fair)
Depth of Research:	2 (good)
Recommendation

Manuscript Information

Manuscript ID: 14031656

Manuscript Title: **Precipitation Forecasting by Means of Dummy Variable on Spatio Temporal Data Forecasting**

Evaluation Report

General Comments	<ol style="list-style-type: none"> 1. This article examines the Generalized Space-Time Autoregressive Integrated Moving Average (GSTARIMA) modeling for forecasting rainfall (precipitation), 2. This article does not introduce new theories or methods. 3. This article has a Similarity of 9%
Advantage & Disadvantage	<ol style="list-style-type: none"> 1. There are many grammatical errors in the manuscript, including the articles for missing, plural, and singular forms, 2. The manuscript does not follow the CEA template format 3. Not all formulas have an explanation 4. Writing formulas that are inseparable from writing paragraphs causes confusion 5. Matrix formulas C, β, e, and X are not equipped with a formula number 6. The writing of the formula description is inconsistent, some use "notes" and some use "where" and "with" 7. The writing of the coefficient of determination (R²) is inconsistent 8. The capitalization of the word "Table" is inconsistent 9. There are local words in Figs. 3.2 to 3.5 10. There are no units stated on the Y axis in the Figures 11. There is a misspelling of a word, such as "Portmenteau" 12. There is no explanation of Table 3.5

	13. It is a confusing word "out" in the "Alluding to the comparison graph on out sample data of precipitation in four sub-districts of Jabung, Tumpang, Wajak, and Poncokusumo,..."
How to improve	<ol style="list-style-type: none"> 1. The authors must fix the grammatical errors in the manuscript, including the articles 2. The authors must fix the manuscript to follow the CEA template format 3. The authors must explain all notations of formulas 4. The authors must separate formulas from the text in the paragraphs 5. The authors must complete all formula numbers 6. The authors should write formula descriptions in a consistent way 7. The authors must write the sign of the coefficient of determination (R^2) in a consistent way 8. The authors must write the capitalization of the word "Table" in a consistent way 9. The authors must translate all words in Figs. 3.2 to 3.5 into English 10. The authors must write units on the Y axis in all figures 11. The authors must correct the misspelling "Portmenteau" with "Portmanteau" 12. The authors have to add some explanation of Table 3.5 13. The authors may change the word "out" to "our" or "the" or even rephrase the whole sentence in the paragraph
